

Semester Project - final delivery and presentation

Due 2 June 2025 20:00

Instructions

Perform a study on the estimation of 3 software quality factors for your application.

Requirement 2: document evaluation method for each factor; mandatory: for at least one factor you should use a tool. Evaluation method should state what tool and method (referenced) you are using

Requirement 3: Discussion of the results; recommended use of data visualization methods.

Requirement 4: public presentation - weeks 13 and 14

You will load the document only after the presentation
