

Due 14 April 2025 20:00

Instructions

Perform a study on the estimation of 3 software quality factors for your application.

Requirement 1: decide SQ model to be used and decide the 3 factors to be evaluated;

For each factor you must argue why it is important for your application and how you intend to evaluate it.

Mandatory: for at least one factor you should use a tool

This assignment will be evaluated only on Teams (please read the review, if it is the case)
